

**International Wolf Center**

Teaching the World about Wolves

## **Post-Visit Group Discussion and/or Journal Activity**

A reflection of personal values towards wolves may help your group process their visit to the International Wolf Center. You can encourage your group members to re-evaluate their values towards wolves with a group discussion, a journaling activity or a combination of the two. Did any of their ideas, feelings or values change? Analysis of values is a very personal venture, please ensure these activities are conducted in an accepting atmosphere where everyone has the chance to think, express and be unique.

This activity can be paired with the Pre-Visit Group discussion and/or Journal Activity for a “before and after” review of your group’s thoughts on wolves.

How do you feel about wolves?

Do wolves have value?

What is the wolf’s role in the ecosystem?

Did your visit to the International Wolf Center meet your expectations?

What did you learn during our visit?
